YOUR

COATING SOLUTION

GASER TC is qualified to apply ENP for the most important companies of the O&G field.

The facility has two different nickel plating plants, large sand blasting chambers and ovens, selective plating machines: all equipments are oriented to properly coat ball valves, seats, slab but the our expertise allows an effective result on every kind of metal part.

The fully integrated logistic service allows a fast and direct delivery to customers all over the Italian territory.

GASER TC is specialized in deposition of technical particles in a nickel matrix.
